Index to Volume 64

PHYSICAL THERAPY

Pages in PHYSICAL THERAPY are numbered consecutively from January through December. Pages in Volume 64, for the year 1984, are numbered 1 through 1990.

	Pages		Pages
January	1–168	July	1045–1188
February	169–288	August	1189–1348
March	289–460	September	1349–1504
April	461–640	October	1505–1666
May	641–896	November	1667–1794
June	897–1044	December	1795–1990

Subject Index

ADMINISTRATION

Burnout among physical therapists. Schuster ND, Nelson DL, Quisling C. 64:299–303, 1984
Financial model to determine the effect of clinical education programs on physical therapy departments. Lopopolo RB. 64:1396–1402, 1984
Opinions and comments. 64:1721, 1984
Physical therapy documentation using a format for the word processor (Suggestion from the Field). Tada WL, Crowe TK, Stewart KB, Washington KA. 64:1393–1394, 1984
Physical therapy work schedules. Pink M. 64:213–217, 1984
Productivity among physical therapists: An evaluation of one department. Bohannon RW. 64:1242–1244, 1984
Regional differences in physical therapists' incomes. Guccione AA, Jette AM. 64:1209–1213, 1984
Reliability of the auditing process at the University of Montana's physical therapy department. Rase CW, Tognetti-Stuff RK. 64:1088–1090, 1984

AMBULATION

Ambulation outcomes after hip fracture. Barnes B. 64:317–320, 1984
  Commentary on "Ambulation outcomes after hip fracture." Hielema F. 64:320–322, 1984
  Author's response to Commentary on "Ambulation outcomes after hip fracture." Barnes B. 64:322–323, 1984
Behavioral treatment of ambulatory function in a child with myelomeningocele (Case Report). Manella KJ, Varni JW. 64:1536–1539, 1984
Cardiovascular responses during nonweight-bearing and touchdown ambulation. Kathrins BP, O'Sullivan SD. 64:14–18, 1984

AMERICAN PHYSICAL THERAPY ASSOCIATION

American Physical Therapy Association awards for 1984. 64:1706, 1984
American Physical Therapy Association bylaws. 64:1632–1639, 1984
American Physical Therapy Association officers, committees, task forces, and section chairmen. 64:1708–1710, 1984
Conference abstracts—1984. 64:705–760, 1984
Editor's note. Lister MJ. 64:13, 1984
Membership qualifications. 64:1641, 1984
Membership statistics. 64:1707, 1984
1984 Presidential Address. Richardson RW. 64:1693–1696, 1984
Nineteenth Mary McMillan Lecture. Michels E. 64:1697–1704, 1984
Nominees for national office—1984. 64:377–384, 1984
Report of the House of Delegates session. 64:1705, 1984
State board examinations. 64:582–584, 1604–1606, 1984

ARTHRITIS

Ankle and subtalar motion during gait in arthritic patients. Locke M, Perry J, Campbell J, Thomas L. 64:504–509, 1984
Modified walker for patients with polyarticular rheumatoid arthritis (Suggestion from the Field). Fillyaw M. 64:205, 1984

BIOFEEDBACK

Compact device for positional biofeedback (Suggestion from the Field). Bohannon RW, Short D. 64:1692, 1984
How to build simple inexpensive biofeedback systems (Suggestion from the Field). Hallum A. 64:1235–1239, 1984
Subject-induced reinforcement of head lifting in the prone position (Case Report). Hallum A. 64:1390–1392, 1984

BIOMECHANICS

Automated measurement systems for clinical motion analysis. Medeiros JM. 64:1846–1850, 1984
Biomechanics: A neural control perspective. Craik RL. 64:1810–1811, 1984
Biomechanics—A summary of perspectives. LeVeau BF. 64:1812, 1984
Biomechanics and physical therapy: A perspective. Smidt GL. 64:1807–1808, 1984
Biomechanics in clinical practice. Deusinger RH. 64:1860–1868, 1984
Biomechanics of noncontractile tissue: A review. Cornwall MW. 64:1869–1873, 1984
Competencies in biomechanics for the future physical therapist: Suggestions for entry-level curricula. Devine KL. 64:1883–1885, 1984
Developmental biomechanics: Effect of forces on the growth, development, and maintenance of the human body. LeVeau BF, Bernhardt DB. 64:1875–1882, 1984
Editor's note: Forces in action. Lister MJ. 64:1805, 1984
Electromyography in biomechanics. Soderberg GL, Cook TM. 64:1813–1820, 1984
Gait analysis techniques at Rancho Los Amigos Gait Laboratory. Gronley JK, Perry J. 64:1831–1838, 1984
Glossary of biomechanical terms, concepts, and units. Rodgers MM, Cavanagh PR. 64:1886–1902, 1984
Introduction. LeVeau BF. 64:1806, 1984
Kinesiology versus biomechanics: A perspective. Cerny K. 64:1809, 1984
Objective clinical evaluation of function—Gait analysis. Laughman RK, Askew LJ, Bleimeyer RR, Chao EY. 64:1839–1845, 1984
Pathomechanics of stance: Clinical concepts for analysis. Cerny K. 64:1851–1859, 1984
Techniques for clinical assessment of human movement. Yack HJ. 64:1821–1830, 1984

AMERICAN PHYSICAL THERAPY ASSOCIATION

American Physical Therapy Association awards for 1984. 64:1706, 1984
American Physical Therapy Association bylaws. 64:1632–1639, 1984
American Physical Therapy Association officers, committees, task forces, and section chairmen. 64:1708–1710, 1984
Conference abstracts—1984. 64:705–760, 1984
Editor's note. Lister MJ. 64:13, 1984
Membership qualifications. 64:1641, 1984
Membership statistics. 64:1707, 1984
1984 Presidential Address. Richardson RW. 64:1693–1696, 1984
Nineteenth Mary McMillan Lecture. Michels E. 64:1697–1704, 1984
Nominees for national office—1984. 64:377–384, 1984
Report of the House of Delegates session. 64:1705, 1984
State board examinations. 64:582–584, 1604–1606, 1984

ARTHRITIS

Ankle and subtalar motion during gait in arthritic patients. Locke M, Perry J, Campbell J, Thomas L. 64:504–509, 1984
Modified walker for patients with polyarticular rheumatoid arthritis (Suggestion from the Field). Fillyaw M. 64:205, 1984

BIOFEEDBACK

Compact device for positional biofeedback (Suggestion from the Field). Bohannon RW, Short D. 64:1692, 1984
How to build simple inexpensive biofeedback systems (Suggestion from the Field). Hallum A. 64:1235–1239, 1984
Subject-induced reinforcement of head lifting in the prone position (Case Report). Hallum A. 64:1390–1392, 1984

BIOMECHANICS

Automated measurement systems for clinical motion analysis. Medeiros JM. 64:1846–1850, 1984
Biomechanics: A neural control perspective. Craik RL. 64:1810–1811, 1984
Biomechanics—A summary of perspectives. LeVeau BF. 64:1812, 1984
Biomechanics and physical therapy: A perspective. Smidt GL. 64:1807–1808, 1984
Biomechanics in clinical practice. Deusinger RH. 64:1860–1868, 1984
Biomechanics of noncontractile tissue: A review. Cornwall MW. 64:1869–1873, 1984
Competencies in biomechanics for the future physical therapist: Suggestions for entry-level curricula. Devine KL. 64:1883–1885, 1984
Developmental biomechanics: Effect of forces on the growth, development, and maintenance of the human body. LeVeau BF, Bernhardt DB. 64:1875–1882, 1984
Editor's note: Forces in action. Lister MJ. 64:1805, 1984
Electromyography in biomechanics. Soderberg GL, Cook TM. 64:1813–1820, 1984
Gait analysis techniques at Rancho Los Amigos Gait Laboratory. Gronley JK, Perry J. 64:1831–1838, 1984
Glossary of biomechanical terms, concepts, and units. Rodgers MM, Cavanagh PR. 64:1886–1902, 1984
Introduction. LeVeau BF. 64:1806, 1984
Kinesiology versus biomechanics: A perspective. Cerny K. 64:1809, 1984
Objective clinical evaluation of function—Gait analysis. Laughman RK, Askew LJ, Bleimeyer RR, Chao EY. 64:1839–1845, 1984
Pathomechanics of stance: Clinical concepts for analysis. Cerny K. 64:1851–1859, 1984
Techniques for clinical assessment of human movement. Yack HJ. 64:1821–1830, 1984

BURNS

Easy application of silastic elastomer (Suggestion from the Field). Richard RL. 64:1078, 1984
Fundamentals of acute burn care and physical therapy management. Wright PC. 64:1217–1231, 1984
Physical therapists as scar modifiers. Johnson CL. 64:1381–1387, 1984

CANCER

Physical therapy and hospice: Concept and practice. Toot J. 64:665–671, 1984
Understanding and helping people who have cancer: A special communication. Flomenhoft D. 64:1232–1234, 1984

CARDIOVASCULAR

Cardiovascular responses during nonweight-bearing and touchdown ambulation. Kathrins BP, O'Sullivan SD. 64:14–18, 1984
Changes in rate-pressure product with physical training of individuals with coronary artery disease. May GA, Nagle FJ. 64:1361–1366, 1984
Heart rate and blood pressure response to several methods of strength training. Greer M, Dimick S, Burns S. 64:179–183, 1984
Perceived exertion: A review. O'Sullivan SB. 64:343–346, 1984

COMPUTER COMMUNICATION

Computer Communication. 64:391–392, 567–570, 812–814, 968–970, 1102–1109, 1263–1265, 1426–1431, 1581–1589, 1724–1729, 1917, 1984

EDUCATION

Clinical Education

Clinical education model for staff training in orthopedic manual therapy. Yamada JK, Montague EC. 64:1084–1087, 1984
Clinical experience and cognition of a physical therapy procedure. Marcoux B, Pinkston D. 64:1545–1548, 1984
Effectiveness of the clinical instructor: Students' perspective. Emery MJ. 64:1079–1083, 1984
Financial model to determine the effect of clinical education programs on physical therapy departments. Lopopolo RB. 64:1396–1402, 1984

Continuing Education

Assessing the change of practice by physical therapists after a continuing education program. Mays MJ. 64:50–54, 1984

Educational Program Listings

Educational programs in physical therapy. 64:572–582, 1592–1604, 1984

Patient Education

Comparison of methods of teaching children proper lifting techniques. Spence SM, Jensen GM, Shepard KF. 64:1055–1061, 1984
Using home video equipment for the handicapped child (Suggestion from the Field). Michael B. 64:1691, 1984

Professional Education

Competencies in biomechanics for the future physical therapist: Suggestion for entry-level curricula. Devine KL. 64:1883–1885, 1984
Entry-level master's degree: A decade of experience. Blood H. 64:208–212, 1984
Personality characteristics and expressed career choice of graduating physical therapy students. Rovezzi-Carroll S, Leavitt R. 64:1549–1552, 1984
Physical therapists' attitudes toward teaching. Sotosky JR. 64:347–350, 1984
Preparation of physical therapists for employment in public schools: A new approach. McLaurin SE. 64:674–677, 1984
Review of the postbaccalaureate degree for professional entry into physical therapy. MacKinnon JL. 64:938–942, 1984

Recruitment and Admissions

Admission predictors for pre-physical therapy majors. McGinnis ME. 64:55–58, 1984

ELECTROMYOGRAPHY

Electromyographic analysis of selected muscles during sitting push-ups: Effects of position and sex. Anderson DS, Jackson MF, Kropf DS, Soderberg GL. 64:24–28, 1984
Electromyographic analysis of selected muscles during the lateral step-up exercise. Brask B, Lueke RH, Soderberg GL. 64:324–329, 1984
Electromyographic results of inhibitory splinting. Mills VM. 64:190–193, 1984
Electromyography in biomechanics. Soderberg GL, Cook TM. 64:1813–1820, 1984

ELECTROTHERAPY

Electrical Stimulation

Electrical stimulation to reduce chronic toe-flexor hypertonicity (Case Report). Fulbright JS. 64:523–525, 1984
Lateral electrical surface stimulation as an alternative to bracing in the treatment of idiopathic scoliosis: Treatment protocol and patient acceptance. Eckerson LF, Axelgaard J. 64:483–490, 1984

Iontophoresis

Iontophoresis to aid in releasing tendon adhesions (Suggestion from the Field). Langley PL. 64:1395, 1984
Opinions and comments. 64:956–959, 1984

Ultrasound

Alterations in ankle dorsiflexion torque as a result of continuous ultrasound to the anterior tibial compartment. Black KD, Halverson JL, Majerus DA, Soderberg GL. 64:910–913, 1984
Opinions and comments. 64:550–553, 1984
Ultrasound for subacromial bursitis (Case Report). Gorkiewicz R. 64:46–47, 1984

EQUIPMENT

Assessing maximal static ventilatory muscle pressures using the "bugle" dynamometer (Suggestion from the Field). Sobush DC, Dunning M III. 64:1689–1690, 1984
Compact device for positional biofeedback (Suggestion from the Field). Bohannon RW, Short D. 64:1692, 1984
Device to assist training in balancing on the rear wheels of a wheelchair (Suggestion from the Field). Hinrichsen LC, Nordstrom C, Law DF. 64:672–673, 1984
Early use of adaptable seating for patients with head trauma (Suggestion from the Field). Keener SM, Sweigart JE. 64:206–207, 1984
How to build simple inexpensive biofeedback systems (Suggestion from the Field). Hallum A. 64:1235–1239, 1984
Modified walker for patients on intravenous therapy (Suggestion from the Field). Ganz SB. 64:48, 1984
Modified walker for patients with polyarticular rheumatoid arthritis (Suggestion from the Field). Fillyaw M. 64:205, 1984
Opinions and comments. 64:553, 1984
Role of soft orthosis in treating plantar fasciitis (Suggestion from the Field). Goulet MJ. 64:1544, 1984
Rolling board for treatment and evaluation of neurologically involved patients (Suggestion from the Field). Bohannon RW, Larkin PA. 64:1543, 1984
Thirty-degree prone positioning board for children with gastroesophageal reflux (Suggestion from the Field). Bubenko S, Flesch P, Kollar C. 64:1240–1241, 1984
Using home video equipment for the handicapped child (Suggestion from the Field). Michael B. 64:1691, 1984

ETHICS

Applying the principles of informed consent to patient care: Legal and ethical considerations for physical therapy. Purtilo RB. 64:934–937, 1984

GAIT

Ankle and subtalar motion during gait in arthritic patients. Locke M, Perry J, Campbell J, Thomas L. 64:504–509, 1984

Assessing the reliablity of measurements from the Krusen limb load monitor to analyze temporal and loading characteristics of normal gait. Carey PB, Wolf SL, Binder-Macleod SA, Bain RL. 64:199–203, 1984

Clinical gait assessment in the neurologically impaired: Reliability and meaningfulness. Holden MK, Gill KM, Magliozzi MR, Nathan J, Piehl-Baker L. 64:35–40, 1984

Foot-ground pressure pattern of standing hemiplegic patients: Major characteristics and patterns of improvement. Dickstein R, Nissan M, Pillar T, Scheer D. 64:19–23, 1984

Gait analysis techniques at Rancho Los Amigos Gait Laboratory. Gronley JK, Perry J. 64:1831–1838, 1984

Objective clinical evaluation of function—Gait analysis. Laughman RK, Askew LJ, Bleimeyer RR, Chao EY. 64:1839–1845, 1984

Pathomechanics of stance: Clinical concepts for analysis. Cerny K. 64:1851–1859, 1984

GERIATRICS

Active mobility of the extremities in older subjects. Walker JM, Sue D, Miles-Elkousy N, Ford G, Trevelyan H. 64:919–923, 1984

Alteration of motor-unit discharge characteristics in aged humans. Nelson RM, Soderberg GL, Urbscheit NL. 64:29–34, 1984

Decrease in timed balance test scores with aging. Bohannon RW, Larkin PA, Cook AC, Gear J, Singer J. 64:1067–1070, 1984

Rehabilitation of the older person: A psychosocial focus. Lewis CB. 64:517–522, 1984

GROWTH AND DEVELOPMENT

Cross-sectional study of gross and fine motor development: Birth to 6 years of age. Noller K, Ingrisano D. 64:308–316, 1984

Early detection of scoliosis: A neurological approach using the asymmetrical tonic neck reflex. Connolly BH, Michael BT. 64:304–307, 1984

HEAD INJURY

Early use of adaptable seating for patients with head trauma (Suggestion from the Field). Keener SM, Sweigart JE. 64:206–207, 1984

Predictive validity of Rappaport's Disability Rating Scale in subjects with acute brain dysfunction. Eliason MR, Topp BW. 64:1357–1360, 1984

Reduction of hypertonicity by early casting in a comatose head-injured individual (Case Report). Barnard P, Dill H, Eldredge P, Held JM, Judd DLM, Nalette E. 64:1540–1542, 1984

HEMIPLEGIA

Foot-ground pressure pattern of standing hemiplegic patients: Major characteristics and patterns of improvement. Dickstein R, Nissan M, Pillar T, Scheer D. 64:19–23, 1984

Isokinetic testing in patients with hemiparesis: A pilot study. Watkins MP, Harris BA, Kozlowski BA. 64:184–189, 1984

Opinions and Comments. 64:959–960, 1984

KINESIOLOGY

Analysis of rotation accompanying shoulder flexion. Blakely RL, Palmer ML. 64:1214–1216 1984

Effect of pelvic tilt on standing posture. Day JW, Smidt GL, Lehmann T. 64:510–516, 1984

Effect of trunk stabilization on quadriceps femoris muscle torque. Hart DL, Stobbe TJ, Till CW, Plummer RW. 64:1375–1380, 1984

Electromyographic analysis of selected muscles during sitting push-ups: Effect of position and sex. Anderson DS, Jackson MF, Kropf DS, Soderberg GL. 64:24–28, 1984

Electromyographic analysis of selected muscles during the lateral step-up exercise. Brask B, Lueke RH, Soderberg GL. 64:324–329, 1984

Isokinetic strength characteristics of the quadriceps femoris and hamstring muscles in high school students. Holmes JR, Alderink GJ. 64:914–918, 1984

Quantitative description of two sitting postures: With and without a lumbar support pillow. Majeske C, Buchanan C. 64:1531–1533, 1984

- Commentary on "Quantitative description of two sitting postures: With and without a lumbar support pillow." Miller DJ. 64:1533–1534, 1984
- Authors' response to Commentary on "Quantitative description of two sitting postures: With and without a lumbar support pillow." Majeske C, Buchanan C. 64:1535, 1984

MUSCLE STRENGTH

Alterations in ankle dorsiflexion torque as a result of continuous ultrasound to the anterior tibial compartment. Black KD, Halverson JL, Majerus DA, Soderberg GL. 64:910–913, 1984

Clinical assessment of trunk flexor muscle strength in healthy girls 3 to 7 years of age. Baldauf KL, Swenson DK, Medeiros JM, Radtka SA. 64:1203–1208, 1984

Effect of trunk stabilization on quadriceps femoris muscle torque. Hart DL, Stobbe TJ, Till CW, Plummer RW. 64:1375–1380, 1984

Effects of an aquatic fitness program on the muscular strength and endurance of patients with multiple sclerosis. Gehlsen GM, Grigsby SA, Winant DM. 64:653–657, 1984

Isokinetic strength characteristics of the quadriceps femoris and hamstring muscles in high school students. Holmes JR, Alderink GJ. 64:914–918, 1984

MUSCULAR DYSTROPHY

Clinical trials in Duchenne dystrophy: Standardization and reliability of evaluation procedures. Florence JM, Pandya S, King WM, Robison JD, Signore LC, Wentzell M, Province MA (Other members of the Collaborative Investigation of Duchenne Dystrophy Group). 64:41–45, 1984

NERVE CONDUCTION

Alteration of motor-unit discharge characteristics in aged humans. Nelson RM, Soderberg GL, Urbscheit NL. 64:29–34, 1984

Effect of technique variation on sensory nerve conduction characteristics. Stone LA. 64:498–503, 1984

Median nerve F-wave conduction in healthy subjects. Cornwall MW, Nelson C. 64:1679–1683, 1984

NEUROPHYSIOLOGY

Characteristics of vestibular function and static balance skills in deaf children. Potter CN, Silverman LN. 64:1071–1075, 1984

Electromyographic results of inhibitory splinting. Mills VM. 64:190–193, 1984

PAIN

Role of the physical therapist at pain treatment centers: A survey. Doliber CM. 64:905–909, 1984

PEDIATRICS

Behavioral treatment of ambulatory function in a child with myelomeningocele (Case Report). Manella KJ, Varni JW. 64:1536–1539, 1984

Characteristics of vestibular function and static balance skills in deaf children. Potter CN, Silverman LN. 64:1071–1075, 1984

Clinical assessment of trunk flexor muscle strength in healthy girls 3 to 7 years of age. Baldauf KL, Swenson DK, Medeiros JM, Radtka SA. 64:1203–1208, 1984

Comparison of methods of teaching children proper lifting techniques. Spence SM, Jensen GM, Shepard KF. 64:1055–1061, 1984

Developmental biomechanics: Effect of forces on the growth, development, and maintenance of the human body. LeVeau BF, Bernhardt DB. 64:1874–1882, 1984

Evaluation of children with Down syndrome who participated in an early intervention program: Second follow-up study. Connolly BH, Morgan S, Russell FF. 64:1515–1519, 1984
Opinions and comments. 64:956, 1984
Reliability of observational measures of the Movement Assessment of Infants. Harris SR, Haley SM, Tada WL, Swanson MW. 64:471–475, 1984
Commentary on "Reliability of observational measures of the Movement Assessment of Infants." Connolly BH. 64:475–476, 1984
Senior author's response to Commentary on "Reliability of observational measures of the Movement Assessment of Infants." Harris SR. 64:477, 1984
Rolling board for treatment and evaluation of neurologically involved patients (Suggestion from the Field). Bohannon RW, Larkin PA. 64:1543, 1984
Subject-induced reinforcement of head lifting in the prone position (Case Report). Hallum A. 64:1390–1392, 1984

PHYSICAL FITNESS

Effects of an aquatic fitness program on the muscular strength and endurance of patients with multiple sclerosis. Gehlsen GM, Grigsby SA, Winant DM. 64:653–657, 1984
Effects of physical conditioning on self-concept of adult obese males. Short MA, DiCarlo S, Steffee WP, Pavlou K. 64:194–198, 1984
Perceived exertion: A review. O'Sullivan SB. 64:343–346, 1984
Physiological effects of exercise in the diabetic. Jette DU. 64:339–342, 1984

PROFESSIONAL RELATIONS

Basic requirements for initiating an interdisciplinary process. Darling LA, Ogg HL. 64:1684–1686, 1984
Physician knowledge and utilization of physical therapy procedures. Ulli RM, Shepard KF, Savinar E. 64:1523–1530, 1984

PUBLICATIONS AND AUDIOVISUAL MATERIALS

Publications and audiovisual materials. 64:232–234, 586–588, 1114–1116, 1434, 1740–1749, 1984

RANGE OF MOTION

Active mobility of the extremities in older subjects. Walker JM, Sue D, Miles-Elkousy N, Ford G, Trevelyan H. 64:919–923, 1984
Effect of repeated eight-minute muscle loading on the angle of straight-leg raising. Bohannon RW. 64:491–497, 1984
Iontophoresis to aid in releasing tendon adhesions (Suggestion from the Field). Langley PL. 64:1395, 1984
Low-load prolonged stretch vs. high-load brief stretch in treating knee contractures. Light KE, Nuzik S, Personius W, Barstrom A. 64:330–333, 1984

REHABILITATION

Concepts from medical anthropology for clinicians. Parry KK. 64:929–933, 1984
Electrical stimulation to reduce chronic toe-flexor hypertonicity (Case Report). Fulbright JS. 64:523–525, 1984
Fluidotherapy® and exercise in the management of sickle cell anemia (Clinical Report). Alcorn R, Bowser B, Henley EJ, Holloway V. 64:1520–1522, 1984

SCOLIOSIS

Early detection of scoliosis: A neurological approach using the asymmetrical tonic neck reflex. Connolly BH, Michael BT. 64:304–307, 1984
Lateral electrical surface stimulation as an alternative to bracing in the treatment of idiopathic scoliosis: Treatment protocol and patient acceptance. Eckerson LF, Axelgaard J. 64:483–490, 1984

SPLINTING AND CASTING

Reduction of hypertonicity by early casting in a comatose head-injured individual (Case Report). Barnard P, Dill H, Eldredge P, Held JM, Judd DLM, Nalette E. 64:1540–1542, 1984

STATE BOARD EXAMINATIONS

State board examinations. 64:582–584, 1604–1606, 1984

TESTS AND MEASUREMENTS

Automated measurement systems for clinical motion analysis. Medeiros JM. 64:1846–1850, 1984
Biomechanics in clinical practice. Deusinger RH. 64:1860–1868, 1984
Clinical trials in Duchenne dystrophy: Standardization and reliability of evaluation procedures. Florence JM, Pandya S, King WM, Robison JD, Signore LC, Wentzell M, Province MA (Other members of the Collaborative Investigation of Duchenne Dystrophy Group). 64:41–45, 1984
Isokinetic testing in patients with hemiparesis: A pilot study. Watkins MP, Harris BA, Kozlowski BA. 64:184–189, 1984
Neurological screening examination: A multidisciplinary assessment of patients on neurological science services (Suggestion from the Field). Urie D, Dearth E, Warson JS. 64:526–527, 1984
Opinions and comments. 64:1573–1574, 1984
Predictive validity of Rappaport's Disability Rating Scale in subjects with acute brain dysfunction. Eliason MR, Topp BW. 64:1357–1360, 1984
Reliability of observational measures of the Movement Assessment of Infants. Harris SR, Haley SM, Tada WL, Swanson MW. 64:471–475, 1984
Commentary on "Reliability of observational measures of the Movement Assessment of Infants." Connolly BH. 64:475–476, 1984
Senior author's response to Commentary on "Reliability of observational measures of the Movement Assessment of Infants." Harris SR. 64:477, 1984
Stabilization of the trunk and pelvis while measuring hip internal rotation (Suggestion from the Field). Gajdosik R, Mell D. 64:49, 1984
Techniques for clinical assessment of human movement. Yack HJ. 64:1851–1859, 1984
Therapist agreement for palpation and observation of iliac crest heights. Mann M, Glasheen-Wray M, Nyberg R. 64:334–338, 1984
Underwater weighing using the Hubbard tank vs the standard tank. Williams D, Anderson T, Currier D. 64:658–664, 1984

THERAPEUTIC EXERCISE

Documentation of the resolution of weakness in a patient with Guillain-Barré syndrome (Clinical Report). Bohannon RW, Dubuc WE. 64:1388–1389, 1984
Effect of repeated eight-minute muscle loading on the angle of straight-leg raising. Bohannon RW. 64:491–497, 1984
Low-load prolonged stretch vs. high-load brief stretch in treating knee contractures. Light KE, Nuzik S, Personius W, Barstrom A. 64:330–333, 1984
Pernicious anemia: The disease and physical therapy management (Case Report). Merenstein A, Schenkman M. 64:1076–1077, 1984
Physical therapy treatment of a patient with a conversion reaction (Case Report). MacKinnon JL. 64:1687–1688, 1984

THESES AND DISSERTATIONS

Theses and dissertations—Titles. 64:130–136, 1984

TRANSCUTANEOUS ELECTRICAL NERVE STIMULATION

Changes in sympathetic tone associated with different forms of transcutaneous electrical nerve stimulation in healthy subjects. Wong RA, Jette DU. 64:478–482, 1984
Effect of transcutaneous electrical nerve stimulation on human blood β-endorphin levels. O'Brien WJ, Rutan FM, Sanborn C, Omer GE. 64:1367–1374, 1984
Method of determining optimal stimulation sites for transcutaneous electrical nerve stimulation. Berlant SR. 64:924–928, 1984.
Opinions and comments. 64:1574–1576, 1984
Response of plasma beta-endorphins to transcutaneous electrical nerve stimulation in healthy subjects. Hughes GS Jr, Lichstein PR, Whitlock D, Harker C. 64:1062–1066, 1984

Role of the physical therapist at pain treatment centers: A survey. Doliber CM. 64:905–909, 1984

ULTRAVIOLET

The penetration of ultraviolet light through transparent dressings (Case Report). MacKinnon JL, Cleek PJ. 64:204, 1984

WRITING

Practical implications of the decimal point (Writing Tips). Lehmkuhl LD. 64:549, 1984
Review and edit your own writing (Writing Tips). LeVeau B. 64:98–99, 1984
Ten myths about professional writing (Writing Tips). Shilling LM. 64:1417–1423, 1984
Writing the self-assessment quiz (Writing Tips). 64:965, 1984

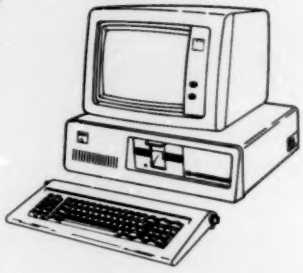
COMPUTER SYSTEMS FOR PHYSICAL THERAPY PRIVATE PRACTICE

In the dynamic and competitive field of Physical Therapy, the private practitioner finds a growing need for that extra edge. The **Physical Therapy Office System**® provides a range of capabilities designed to efficiently and economically automate the administrative operations of a private practice. The result is improved cash flow, increased revenues, improved physician and patient relations and increased productivity of office staff.



Major functions of the system include:

- **Patient Information Management and Analysis**
- **Patient Billing**
- **Insurance Claim Processing**
- **Acccounts Receivable**
- **Practice Analysis and Management Reporting**

To learn what our computer program can do for your practice, attend an **APS** Seminar near you.
